

ReWear AI

A responsible next step for unwanted textiles

A web prototype that helps urban residents choose donation, repair, reuse, upcycling, recycling or responsible disposal for unwanted clothes, footwear and textiles.

What this demo shows

A user can describe an item, choose its condition and city, receive a route recommendation, and ask the assistant for item-specific guidance. The documented workflow uses IBM BOB for prompt design, testing and responsible AI review.

SUBMISSION DETAILS

PRIMARY SDG	SDG 12 - Responsible Consumption and Production
ADDITIONAL SDGS	SDG 11 - Sustainable Cities; SDG 13 - Climate Action
REPOSITORY	github.com/shraddha-123P/rewear-ai
PROTOTYPE	HTML, CSS and JavaScript responsive web prototype

Prototype workflow

The prototype turns a vague disposal question into a practical next action.

1 Describe

Item, condition, city and handover preference.

2 Classify

Donation, repair, reuse, upcycling, recycling or disposal.

3 Match

Compare details with suitable route categories.

4 Explain

Give a reason and preparation guidance.

5 Verify

Confirm live rules through the official channel.

Example result screen

YOUR RESPONSIBLE ROUTE

Respun / textile upcycling route

Torn clothing is better treated as textile material than as wearable donation.

Tags: damaged | textiles | Bengaluru

Next action

Verify pickup or drop-off availability.

Sample conversations and IBM BOB

Run these examples in the live app and in IBM BOB. Capture screenshots of the results for the Google Form.

WEARABLE CLOTHES - DELHI

Clean wearable clothes may be donated for reuse. Check Goonj or Share At Door Step depending on availability.

DAMAGED SHOES - MUMBAI

Look for a specialist footwear upcycling or recycling route such as GreenSole. Do not use a normal clothing donation stream.

TORN TEXTILES - BENGALURU

Check a textile-recovery partner such as Respun. Pack items clean and dry and verify current acceptance rules.

REWEAR AI | SYSTEM PROMPT USED WITH IBM BOB

You are ReWear AI, a responsible textile-waste assistant for urban residents in India.

Ask for item type, condition, city, and pickup or drop-off preference. Recommend donation, reuse, repair, upcycling, recycling, or responsible disposal. Explain the reason. Never invent acceptance rules or pickup availability. Ask the user to verify current details through the official channel.
